

Former Politician turns Entrepreneur with New Health Supplement for Women.

As former NSW Leader of The Opposition, Kerry Chikarovski knows all about a busy and hectic lifestyle. She also knows, and has experienced firsthand, the toll it can take on health and wellbeing.

Like a lot of women her age, she recently began to put on weight and was missing the kind of energy that she had sustained during her political career. While she continued to exercise and watch her diet she couldn't shift the additional kilos in the same way as when she was younger.

In a bid to boost her metabolism and increase her energy levels, Chikarovski has tried a myriad of supplements and tonics over the years to no avail. As a result she joined with one of Australia's leading nutritional supplement manufacturer's to develop a natural supplement formulated to improve energy and boost metabolism.

The result is ***SUPPREXXA*** the first product from Chikarovski's new health company, **Chika Health**.

SUPPREXXA is a NEW supplement that supports metabolism and nutrient requirements during weight loss programs. It contains nutrients that assist in the balancing of sugar levels and support the body's metabolism of fats, proteins, sugars and carbohydrates.

Kerry says the combination of ingredients is specifically designed for the unique dynamics experienced by women later in life.

"My research told me that the key to weight loss was diet, exercise and a healthy metabolism. As I've gotten older I've found it harder to lose weight while still watching what I eat and maintaining a regular exercise program. I've spoken to hundreds of women my age who complain of the same issues."

Chikarovski says ***SUPPREXXA*** has been designed for women 40yrs+ who are looking for a natural alternative to boost their metabolism and get their energy levels up.

"What I've learnt from my experience is that if you get your metabolism and energy levels right, you're not craving sugar all the time and it's much easier to lose weight. I am very proud to be launching this product under my new company Chika Health."

In addition to positive consumer feedback, ***SUPPREXXA*** has been enthusiastically embraced by retailers. It will be stocked nationally in Woolworths, Priceline, My Chemist and selected National pharmacies stores from April 6th.
